Hello Phil, Ray:

I contacted Mr. Saenz following your recommendation that I verify the current drinking water situation around the García Hill compound in Kleberg County, Texas, and received the below e-mail in reply. It shows that there is a possibility that ground water may still be used for drinking in some households in the area surrounding the PA No. 3 of Kingsville Dome mining site, though the Garcia Hill compound is now hooked to a public water supply system. Please let me know if you have more questions on this. Thanks,

José Eduardo Torres

Subject: Water wells Kleberg County

---

Mr. Torres,  
Hope you are doing great.  
An incomplete list of households that have water wells just outside the permitted area for URI's uranium mining in Kleberg County is:

- Fred Radford
- Gary Underbrink
- John Cumberland
- Gloria Rosse
- Tom Best
- Irene Cumberland
- Tomas Garza-Ferman Garza (3 households just west of PAA 3 on Garcia Land
- Oliver Hinojosa-well across fence of Paa3 (northwest)
- Garcia Hill-2 wells but hosholds currently drinking water

purchased from the Ricardo Water Co-op.

Some of these household are connected to the Ricardo Water Co-op even though they have water wells. Please call Carola Serrato with the South Texas Water Authority at 361-592-9223 for more information. I have told her that you might be calling for information so she is expecting your call.

By this e-mail, I am also requesting any information regarding expansion of the Water Exempted Area by operator URI, inc. in Kleberg County.

thanks  
Teo Saenz
